21

22

11:00 – 12:00

«I want my air clean»
A Street Marching organized by **Arti në Duart e Gruas** & **Green Center**
@Korçë

INDIVIDUALS AS **ACTORS OF CHANGE**

- LevizAlbania is the project that has supported individuals through grant schemes since the First Call for Applications. A unique mechanism which has now become a trend and is being applied by other national/international donors operating in our country. The Local Democracy Week will help introduce the need for more synergy and collaboration among individuals, aiming to maximize their individual activity in function of the local democracy through coordination and cooperation of actions in specific causes and cases. Strengthening the importance or impact of the successes and changes achieved by individuals can serve as an opportunity to increase positive pressure on our local elected officials in regard to the quality of local governance and increasing citizens' role in this process.

STRONGER **TOGETHER**

- Experience during the implementation of the LevizAlbania project has shown that in certain moments working together has helped in finding solutions, but also in receiving timely feedback from local governance institutions regarding cases/causes related to community and citizen interest. In many cases, formally or informally, LevizAlbania has created the necessary synergy among civil society actors engaged with supporting LA react in certain situations. After years of implementation by LA, this approach should be further consolidated and this can be achieved best by bringing all these actors together to discuss the lessons learned and needs and most importantly, introduce the experience in LA, the practice followed and the experience gained in this regard to the public and other actors engaged in supporting civil society. Collaboration among organizations of civil society at the local and central level or networking among organizations as a mechanism to increase impact and learning experience are some of the steps that LevizAlbania has undertaken in regard to increasing collaboration and interaction among civil society actors.

CHANGE IS **POSSIBLE**

- The third pillar of #LDW2022 is fully focused on introducing and identifying success cases, success stories and successful people who have improved their lives and the lives of the communities that they represent through direct engagement, activism, volunteering and resistance. 'Change is possible' aims to bring to the public and the actors themselves cases in which change has been able to motivate the affected target groups to engage in initiatives and take concrete actions in the future. Unlike the other two pillars in the first four days of #LDW2022, in this pillar the project commits to have not one, but at least 2 or more activities under the motto "Change is possible if we start with ourselves".
